From La Crosse, Wis. Received through John A. Salzer Seed Company, April, 1901.

Dwarf Victoria.

6199. LINUM USITATISSIMUM.**Flax.**

From Paris, France. Received through Vilmorin-Andrieux & Co., April 8, 1901.
Irish-grown seed.

6200 to 6220. ORYZA SATIVA.**Rice.**

From the Philippine Islands. Presented by Hon. J. Aranato, secretary of agriculture of the island of Negros. Received March 9, 1901.

A collection of native varieties of rice as follows:

6200.

Capao. An early variety, to be sown on irrigated land in May and harvested in September.

6201.

Gui-os. An early variety, sown on irrigated land in May and harvested in September.

6202.

Cabatinjan. An early variety, sown on irrigated or dry land in May and June and harvested in September and October. The grains of this variety, after being boiled, cling together and are therefore adapted for use in the preparation of jellies.

6203.

Bunja-tagum. An early variety, sown on irrigated land early in June and harvested early in October. The grain is very white and highly esteemed for food.

6204.

Morado.

6205.

Cachuri. An early, "fragrant" variety, sown in April and harvested in August. Cultivated on the mountain slopes. Its principal use is for the manufacture of "Pilipig."

6206.

Mayuro. An early variety, sown on irrigated land early in June and harvested in October. The grain is very white and highly esteemed for food.

6207.

Baráo. An early variety, sown on irrigated land early in June and harvested at the end of October.

6208.

Cotsiam. An early rice, sown on irrigated land in April and May and harvested in August and September.
